

AAMIR KHANDWALA

INTERIOR DESIGN

Spring flowers have started to bloom, the sun is setting later and we're trading our winter coats for jackets; we here at Aamir Khandwala Interior Design have spring fever.

NYBG Orchid Dinner

We collaborated with Nicolas Cogrel Floral Design to create a show stopping tablescape for the New York Botanical Garden Orchid dinner at the Plaza Hotel. "Our concept was actually quite simple. Orchids grow on trees in their natural habitat, and we wanted to bring this key element into our design in a sophisticated manner." [Read the full article.](#)

A Collector's Paradise

Our Nomad Project was featured in Design Pataki India. “The process of collecting – antiques, contemporary pieces, or both – essentially involves patience, an eye for detail, and an interior that does justice to the idea of rarity and provenance.” [Read the full article.](#)

Featured Collaborator: Angela Brown Ltd

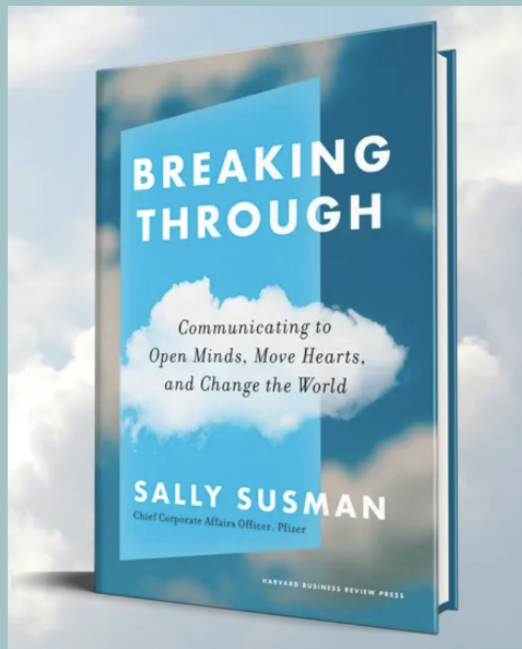

We've partnered with Angela Brown Ltd for decades. Her company showcases beautifully crafted furniture, textiles, wallcovering and lighting. Her philosophy is to bring a deeper connection to the materials we surround ourselves with in our interior spaces. Her ability to create a story through color and texture makes the overall collaborative process highly pleasurable.

What's Happening

What we're seeing: Nick Cave: Forthermore at the Guggenheim. This is a must see, exhibition ends April 10th.

What we're reading: Breaking Through by Sally Susman. [Learn more here.](#)

Home Away from Home

We're excited to share a few shots from our recent installation in Florida. We feel that the connection between interior and exterior spaces should visually relate as outdoor spaces are essentially an extension of your home. [See entire project.](#)

The team at Aamir Khandwala Interior Design wishes you a fabulous spring!
